

Publishers, Content, Communities and the Future

Ian Mulvany, Nature Publishing Group, #SCW08

- "It is intended, first, to place before the general public the grand results of scientific work and scientific discovery"
- "to aid scientific men ... by affording them an opportunity of discussing the various scientific questions that arise from time to time"

Welcome to Nature Precedings

Nature Precedings is a place for researchers to share pre-publication research, unpublished manuscripts, presentations, posters, white papers, technical papers, supplementary findings, and other scientific documents. Submissions are screened by our professional curation team for relevance and quality, but are not subjected to peer review. We welcome high-quality contributions from biology, medicine (except clinical trials), chemistry and the earth sciences. [More details.](#)
