**Email:**

Please provide your email address. In general, most of our information messages are sent only to the "Contact Author" (see below).

**Homepage:**

Please provide the URL of your homepage, if available.

**Gender:**

Please Select

**Title:**

Please Select

**Industry:**

Yes

Please tick if you are a researcher who works for an industrial company.

**Author Roles**

**Contact Author:**

Author 1

This is a mandatory position. The contact author is responsible for all correspondence with Schloss Dagstuhl. Please notify us promptly of any changes in the contact author’s name, affiliation, etc.

**Coordinator:**

No Coordinator

This is an optional position. A coordinator is preferably a junior scientist who helps to coordinate the proposal and the seminar. However, it is the organizers – (senior) outstanding researchers in their areas – who represent the seminar. In general, there is no need to name a coordinator.
If your proposal has more than four authors or multiple authors from the same organization, please give a sound scientific justification for this in the space above, and in the proposal itself. Please note that you may designate a coordinator (see above), who will not be counted as part of the organizer team.

Organizational Issues

Type of Event
- Dagstuhl Seminar
- Dagstuhl Perspectives Workshop

Number of Participants
- About 45
- About 30

Duration
- 5-day seminar
- 3-day seminar

Resubmission

If your proposal is based on a previous submission classified by our Scientific Directorate as "Postponed", "Resubmit" or "Reject", please provide the proposal number of the original submission as stated in the notification letter (e.g. 99-0910).

Predecessor

If your proposed seminar succeeds a previous one in the same area, please give the seminar number of its predecessor (e.g. 11123).

Technical Areas

Miscellaneous
- Seminar might warrant a press release for the mainstream media.
- Seminar is relevant to industry or industrial research.
- Seminar is interdisciplinary, e.g., it covers a research area outside the field of informatics.

Topics
To help us match proposals to reviewers, please select one to three areas that are most relevant to your proposal:

- artificial intelligence, robotics
- bioinformatics
- computer graphics, computer vision
- data bases, information retrieval
- data structures, algorithms, complexity
- hardware
- mobile computing
- modelling, simulation
- multimedia
- networks
- operating systems
- optimization, scheduling
- programming languages, compiler
- security, cryptology
- semantics, formal methods
- society, human-computer interaction
- soft computing, evolutionary algorithms
- software engineering
- verification, logic
- world wide web, internet

Content

Keywords: Andreas

Abstract:
Please restrict yourself to about 250 words. The abstract should summarize the scientific content of your proposal and should be fully comprehensible to potential reviewers who have not read the complete proposal. Proposal reviews will be selected and assigned solely on the basis of the abstracts.

Comments:

Please give any other comments that may be relevant to your submission. This field is available both in the metadata form and in the form for the preferred and block-out dates.

Password

Please give a password that you will remember. You will need this password, together with the proposal identification number that you will received via email upon submission of this form, if you wish to modify this proposal in the future.
