Tuesday:

Share Convesion and Private Information Retrieval (Yuval)
A New Approach to Practical Active-Secure Two-Party Computation (Claudio)
Outsourcing MPC (Seny)

Device cloud (Asokan)
Sensor clouds (Francois Xavier)
Ambient computing (Marc)

Potential talks for the remaining days:
Energy instead of $ as cost measurement
Searchable encryption
Homomorphic encryption
Verifiable computation
Challenges in extending security tools (MPC, PCP) to the cloud
Privacy of genomic computation
Network security   Anonymization for secure MPC?
Cloud storage security
Skeptical view of relevancy of MPC
